

Snowflake Salt Painting

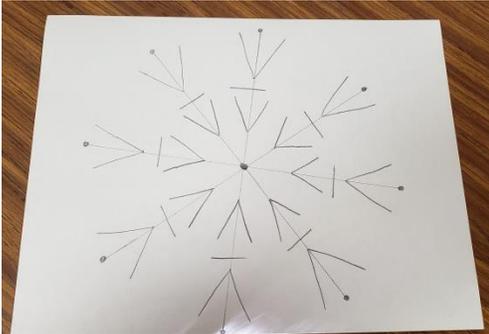

Materials:

- Blank paper
- Pencil
- Salt
- Glue
- Food coloring
- Water cup(s) or paint pallet
- Paint brush

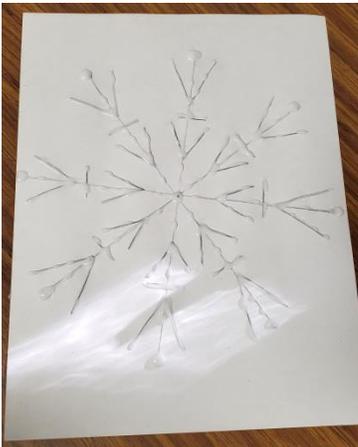

Directions:

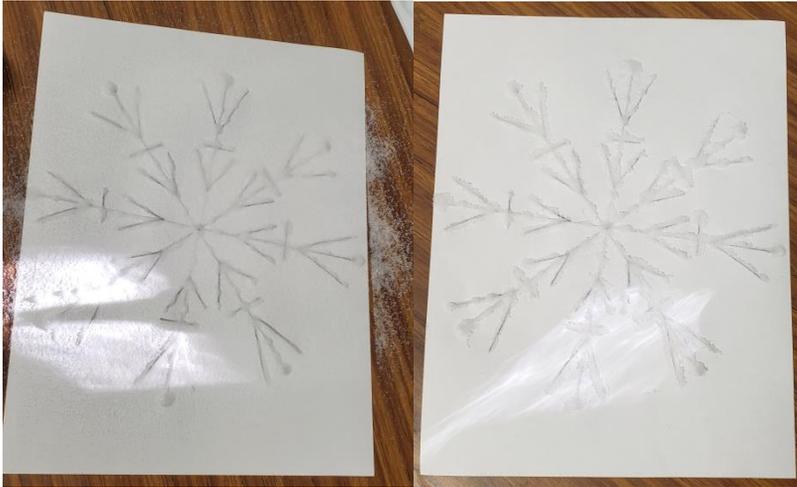

1. On your blank sheet of paper, draw your own snowflake. I found it easier to make one giant snowflake with a few details because it comes out looking neater/cleaner.

2. Using your glue, trace over the snowflake you drew. Make sure not to have huge globs of glue or else it will lose the details of the snowflake.

3. Shake salt over the glue and cover completely. Shake the excess salt off of the paper. Set aside to dry.

4. Once dry, in water cups or paint pallets, mix together water and food coloring of your choice. Using your paintbrush, very lightly paint over your salt snowflake outline. The salt/glue mixture absorbs the watercolors very quickly and easily.

5. Set aside to dry. You now have a beautiful, salty snowflake!
